

Monetisation Audit

Prepared by Sean · October 2026

The Numbers

747

Engaged Audience

5% market premise

20

Program Spots

Deliberately limited

\$1,500

Product Price

THE MATH

20 spots × \$1,500

= \$30,000

REVENUE POTENTIAL

\$30,000

Based on these numbers, a single well-positioned premium program with 20 spots represents a Revenue Potential of **\$30,000 per cohort.**

Option 1: The Nervous System Mobility Accelerator

Crossing what your content demonstrates with what your audience shows it wants, here are 3 profitable paths.

1

What It Is

A premium, 12-week intensive mentorship program blending live weekly Zoom sessions, personalized movement assessments, video drill reviews, and clinical strength progressions to safely achieve full splits and spinal mobility.

2

For Whom

Stiff adults and movement enthusiasts who have spent months or years forcing stretches without progress and feel their hips are permanently locked.

3

Why It Will Sell

Directly solves the core bottleneck exposed in your top-performing content: passive stretching triggers protective tension, while your clinical coaching reprograms the nervous system to accept deeper ranges safely.

Two more profitable paths

OPTION 2

The Front & Middle Splits Blueprint

What It Is

A progressive end-range strength curriculum designed to take intermediate practitioners from partial depth to flat splits using active neurological conditioning.

The Difference

Focuses strictly on lower-body hip mechanics, pelvic alignment, and targeted split milestones.

OPTION 3

Spinal Freedom & Backbend Intensive

What It Is

A targeted workshop and cohort focused on thoracic spine mobility, shoulder opening, and decompressing the posterior chain.

The Difference

A restorative, therapeutic pathway for desk workers and athletes seeking posture correction and back-bending without lower-back compression.

05 IMPLEMENTATION PLAN

If you decide to move forward, this is the launch structure we will use

Immediate Validation (Test Carousel)

Here is the first step to validate demand. Post this simple carousel (black background, white text) to validate demand before building anything.

1

Slide 1 (The Hook)

You stretch every single day.
And your hips are just as tight
as they were six months ago.

2

Slide 2 (The Agitation)

It is not your muscles refusing
to open. It is your nervous
system slamming on the brakes
because it feels zero control in
those end ranges. Pushing
harder only makes your body
fight you back.

3

Slide 3 (Curiosity/Call to Action)

What if you stopped forcing
stretches and started retraining
how your brain perceives end-
range stability? Reply 'I WANT' if
this resonates with you.
